Ms. Beth Halford
Manager, Strategic Partnerships
Agriculture for Life
32 Priddis Creek Drive
Foothills AB T0L 1W2

Dear Ms. Halford:

As Minister of Education, I am proud to support the Classroom Agricultural Program (CAP). This program will provide Grade 4 students in Alberta with information about the prominent role agriculture plays in their daily lives.

As a farmer myself and as a former Central Alberta CAP Coordinator/Volunteer, I support enhancing students understanding of agriculture, especially the role it plays in putting food on our tables. Ensuring students across the province have an opportunity to learn about what goes into making Alberta based food is crucial.

I appreciate the agricultural knowledge and experience CAP delivers to our classrooms. The dedication of the program's volunteers and partners helps to support the teaching and learning of provincial curriculum and provides a rich educational experience to Grade 4 students across Alberta.

Alberta school authorities and teachers are responsible for selecting and approving the resources that are used in the classroom, and I am pleased that programs such as CAP are available to them to support student learning.

Best wishes for continued success this school year.

Sincerely,

Adriana LaGrange
Minister
